# Hybrid Wiper Blades

The first OEM Hybrid Wiper  
Blades for the Aftermarket

# DENSO

## Hybrid Blades

A new vision

DENSO Hybrid Blades set a new benchmark as the world's first OEM Hybrid Blades available in the aftermarket. Initially introduced to the OE market in 2005, these blades combine a low-profile, fully covered blade and arm for a stylish, aerodynamic look.

The unique engineering and superior materials, including a rigid, graphite-coated rubber blade, ensure smooth, long-lasting performance even in challenging conditions.

With features like a common-use vertebra for superior windscreen hold and an integrated, easy-fit system, DENSO Hybrid Blades offer a clear upgrade for drivers looking to enhance both visibility and style. It's no wonder they are the original equipment choice of some of the world's top vehicle marques.

Featuring the same exacting technologies, our aftermarket range is the first to be launched by an OEM brand - and gives you and your customers unprecedented access to the future of wiper technology.

The DENSO logo is displayed in white, italicized, sans-serif capital letters on a red background.

# Features & Benefits

Ideal for aftermarket upgrades, DENSO Hybrid Wiper Blades deliver a streamlined range, a stylish design, and the longevity customers trust.

## **Advanced Wiping Performance:**

Blends the durability and effectiveness of conventional blades with the aerodynamic styling of flat blades.

## **Stylish and Aerodynamic:**

Fully covered, matte black body with a low, unobtrusive profile adds a modern touch and minimizes wind noise.

## **Convenient Installation:**

Common-use vertebra for superior windscreen contact and an integrated fitting system that allows for quick attachment to the wiper arm without hassle.

## OEM Applications

## Upgrade options

MAKE	MODEL
