

Wiper Blades - Expanded Coverage

We are pleased to announce the extension of our wiper blade application coverage to include the latest Chinese and Electric Vehicles recently added to the European car parc. With the rapid growth of EVs from Chinese brands such as BYD, NIO, and POLESTAR, we now offer optimized DENSO wiper blade references specifically adapted to these models.

These newly added applications will ensure improved visibility and premium wiping performance for modern windshields, including panoramic and aerodynamic glass profiles used in EVs.

New Applications - Chinese Vehicles

Make	Model	Model Year
BYD	TANG	2018-
LIFAN	X50	2014-
LYNK & CO	01	2017-

Special Focus: Electric Chinese Cars

Make	Model
BYD	DOLPHIN
BYD	SEA LION 07
BYD	SEAL
MG	MG 4 (EH32)
NIO	ET7
POLESTAR	POLESTAR 2 (534)
SERES	3

Benefits of DENSO Wiper Blades for These Applications

- **OE Technology and Quality:** Guarantees excellent, reliable wiping performance thanks to premium materials and OEM standards
- **Silent Operation:** Enhanced rubber formulation for smooth wiping
- **Model-Specific Fittings:** No adaptors needed - direct-fit for each vehicle
- **High Car Parc Relevance:** Especially in Western & Central Europe

For full reference list of part numbers per vehicle, please consult the updated DENSO E-catalogue or contact your local representative.
